

# Ibrahim Ahmad Amin Ibrahim

Senior Backend PHP Engineer | Laravel Specialist

📍 Al-Giza, Egypt | ✉ [ibrahim.amin@programmer.net](mailto:ibrahim.amin@programmer.net) | ☎ +201069425105 | 🌐 [linkedin.com/in/iaibo](https://www.linkedin.com/in/iaibo)

## PROFESSIONAL SUMMARY

**Senior Backend PHP Engineer** with 7+ years of comprehensive experience in designing, building, and operating high-availability, high-traffic backend systems utilizing **PHP, Laravel, Symfony, and MySQL**.

Proven expertise in **Service-Oriented Architectures (SOA)**, robust **RESTful API** development, system integrations, and distributed environments. Recognized for delivering secure, scalable backend solutions aligned with critical business objectives, including remote collaboration and **on-site** engineering experience (**Dubai**).

## CORE SKILLS

- **Backend & Architecture** PHP, Laravel, Symfony, REST APIs, Webhooks, Service-Oriented Architecture, MySQL, Query Tuning, Database Transactions
- **DevOps & Engineering** Docker, CI/CD Pipelines, Git, Clean Code Principles, Logging, Monitoring, System Performance
- **Frontend (Secondary)** JavaScript, Vue.js, HTML5, CSS3, Bootstrap
- **Additional Technologies** Node.js, TypeScript, Python
- **Soft Skills** Cross-functional coordination, Technical communication, Analytical problem-solving, Adaptability

## WORK EXPERIENCE

### Backend PHP Developer — ABC Hosting Ltd (Remote)

Jan 2024 – Mar 2025

- **Delivered** critical backend features for a live platform currently serving **10,000+ active users**.
- **Maintained** REST endpoints and asynchronous workers handling **5,000+ daily requests** while ensuring consistent system stability.
- **Accelerated** build and release cycles by **35%** through Docker-driven workflow enhancements and improved deployment automation.
- **Integrated** external services processing **300+ webhook events per day**, encompassing complex payment and system callbacks.
- **Instituted** structured logging and retry strategies, successfully **reducing background job failures by 25%**.
- **Collaborated** effectively across **3+ time zones** within a fully remote engineering team environment.

### Senior Backend & Full Stack Engineer — Soldait (Dubai, UAE, on-site)

Aug 2020 – Dec 2023

- **Architected** and developed resilient **Laravel-based backend services** supporting an active user base exceeding **20,000+ users**.
- **Sustained** continuous business functionality via resilient API layers, achieving near **round-the-clock availability**.
- **Enhanced** release stability by 40% by implementing containerized deployments and fully automated CI/CD pipelines.
- **Optimized** database access patterns and request handling logic, successfully **lowering average API latency by 30%**.
- **Mitigated** high-priority production incidents, resulting in a **20% reduction in peak-hour downtime**.
- **Coordinated** over **10 production releases per month** in tight collaboration with Product, Frontend, and DevOps teams.

## PROJECTS: Payments & Integrations Focus

Portfolio: <https://devia.pages.dev>

- **Engineered** robust, **wallet-driven transaction workflows** implemented with complete, verifiable audit trails.
- **Orchestrated** the full payment lifecycle events utilizing **idempotent webhook processing** to guarantee transactional accuracy.
- **Supervised** complex integrations with multiple external payment providers, specifically **Stripe and PayPal**.
- **Successfully** preserved financial consistency across high-volume transactional operations by implementing rigorous data validation and locking mechanisms.

## EDUCATION & CERTIFICATIONS

- **Bachelor of Commerce (Economics)** — Zagazig University, Egypt | 2019
- **Udacity (EGYPT.FWD – ITIDA)** — **Foundation & Professional**

## LANGUAGES

- **Arabic** Native
- **English** Professional Working Proficiency
